Base Plug Kits

DESCRIPTION:

The base plug kit offers an easy way to fill the lifting holes present in the base of the generators. In the air-cooled product this offers rodent and insect protection which could potentially be an issue during service intervals. In liquid cooled product, it completes the look of a finished base for a sleek, streamlined appearance.

Please note that the base plug kit (5652) for the air-cooled product only fits air-cooled units manufactured prior to 4/2008 that do not have the contoured body wrap style.

Paint Kits

DESCRIPTION:

The enclosure is the generator's first line of defense against the elements and is important to keep in good condition. If the generator enclosure is scratched or damaged, it is important to touch up the paint to protect from future corrosion. These paint kits include the necessary paint to properly maintain or touch up a generator enclosure.

Please check with your sales representative to verify proper color coordination.

5653	Tan Kit – Generators manufactured prior to 4/2008 without contoured body style.
5654	Grey Kit – Generators manufactured prior to 4/2008 without contoured body style.
